

GENERIC

Meet Kai. After two weeks at the beach, he's totally tapped into the waves, but a little tapped out at the bank. Can you say ramen noodles?

Luckily, Kai has Prime, so when he needs a prescription, it's easy to find a generic drug that can save him cash.

Generics work the same as name brand drugs. Same active ingredients, tough testing and FDA approval. But they can cost up to 80 percent less. Which has Kai thinking surf & turf!

Prime. Helping you get the medicines you need so you can Go and Do. Because Kai isn't rippin' the H2O to think about prescriptions.
